

Ciao!

*I am enjoying taking Digital
Skills for Visual Media class!*

*I am liking using Photoshop,
Indesign, Animate and Illustra-
tor!*

*Now I can do much more than I
used to do!*

Thank you!

Adobe Photoshop

*In this project I feature a colorful
pic of a fantasy woman and I
introduced some animated Illus-
trator elements . I enjoyed using
the sounds . I wanted to create an
animated postcard where all colors
could match with the music. Calm
and joyful.*

Adobe Animate

*In my raster project I wanted to
manipulate a picture of a beautiful
French inspired pond.*

*In my originals schetch I wanted
to add more layers and work with
free transform and add more type
of edits like mask and color effects.
I ended up creating less layers and
keep it more manageable for my
beginning level.*

Adobe Photoshop

*Illustrator is a very fun aprogram
where you can create your creature
and artwork. I enjoyed using
the pen and scale and distorte the
artworks.*

*I still find it a very challeging
program and i need to work more
on creating more projects so i can
improve my skills*

Adobe Illustrator
